Leopard Catamaran 48 (2015)

The Leopard 48 represents Robertson and Caine's latest innovative developments with modern features not yet seen on production catamarans, while remaining committed to the tried and tested features that have made the Leopard line one of the most sought after brands of catamarans globally.

The most significant modification on the Leopard 48 is the addition of the open forward cockpit with direct access from the saloon. Unique to production catamarans this feature offers increased visibility, ventilation, and a significant new approach on adding increased living space in an ergonomic and safe design feature. This lounging area has a fixed overhead bimini for protection against the elements, forward door for direct access to saloon, splash cover, and drain. Furthermore, the forward door combined with large port lights in the windscreen allow for through ventilation in the saloon, even during a tropical downpour, where the forward bimini prevents water entry. Allowance has been made for drainage by means of a large sump and underwing scuppers, and the forward cockpit door has additional dog clamps to ensure water tightness in heavy sea conditions. In addition, there is provision for installing a splash cover to deflect the worst seas from entering the cockpit.

The Leopard 48 is available with four spacious cabins to port and starboard hull offering options of an entirely dedicated luxurious head with each cabin configuration. She is focused on performance, comfort and offers an abundance of outdoor space.
